## WHAT IS FOREX TRADING..?

### Introduction to Forex Trading

Forex, or Foreign Exchange, is the world's largest financial market where currencies are traded. It's crucial for international trade and finance.

Participants include banks, corporations, and individual traders. Unlike stock markets, Forex operates 24/5. Traders aim to profit by buying low and selling high on currency pairs.

# HOW FOREX TRADING WORKS

## Currency Pairs

Currencies are traded in pairs, such as EUR/USD (Euro/US Dollar). The first currency (EUR) is the "base currency," and the second currency (USD) is the "quote currency."

## Spread

The difference between the buy (bid) and sell (ask) prices, represents the cost of the trade.

## Leverage

Borrowing funds to amplify potential returns, allowing traders to make larger trades than their initial investment. However, it also increases the risk.

## Lot Size

Refers to the number of currency units in a trade. Standard lots are 100,000 units, mini lots are 10,000 units, and micro lots are 1,000 units
